

## Abhishek Joshi

My name is **Abhishek Joshi**. I attended your seminars in Mumbai. I have finally reached Germany and am on verge of completion of 3 months here. Your seminars on Higher education were very helpful and helped me refine my choices. I believe that any student who wishes to study in Germany must attend your seminars.

After coming here, it feels great. The people have treated us very well. The university has had multiple sessions for foreign students, language courses, excursions, industrial visits and guest lecturers coming from top MNC's. German education is truly World Class and it is far more superior than other systems for students since every university has state of the art facilities. The hostels are fabulous. I mean, there was no problem for me since I booked my hostel room online at Studentenwerk. But there is no problems of getting a place to stay here either even if you do not book your hostel rooms from India. There are different institutions such as GWC and others that help people to find Single room and Multiple room apartments here. But to be on a safer side, it's always better to book it from India.

There are parties organized by students almost every week end. On Thursdays we have Cultural nights. That way, people can socialize and make new friends.

You always told us to do that course in cooking in "Mom's kitchen". I followed your advice and it has helped me lot. Eating is not a big problem here, since most of the things that are required are available readily at supermarkets such as Edeka, Lidl and Rewe. The new year was an absolute treat. We went to Berlin for the new year and it was a spectacle. You have to be there to feel it for yourself. It was mesmerizing.

I plan on going to other countries in EU this march with my classmates for a tour. Being a student was never so much fun. I thank you again for all your help.

With warm Regards,

Abhishek Joshi.
