

Krunal Pawar:

The word "exponent" itself describes you . The student's career is on exponential growth. The journey with our principal consultant Niketa Dedhia was amazing. Her concern for minor things was very important aspect during the process. The best part was when we approached Niketa for the first time , she asked us for my CV , one on one session with Niketa which was very uncommon. Normally counselors in Mumbai never ask for CV of students, just pay the fees and we will start the process. Carrot and stick approach by Niketa was very helpful for me which also helped me to understand my shortcomings and areas for development. The university selection, application process and admit letter these phases were very important and the you have been in touch with me for every crucial step. The best part of the whole process was the intercultural training, I think its the USP for Exponent Consultancy Services. I wish the team with best wishes for future endeavours and hope further cooperation for upcoming academic years.

Regards,

Krunal Pawar
